

The Klinkerstene Waste Park has a licensed waste treatment facility for waste stabilisation prior to landfill disposal. The facility handles various types of waste, from but not limited to, the commercial, industrial, mining and oil and gas sectors.

Klinkerstene Waste Park is at the forefront of innovative waste management solutions. Specializing in contaminant immobilisation, liquid and sludge waste stabilisation, and pH modification (including acid and alkaline waste neutralisation). Through the utilisation of advanced techniques, we ensure the safe containment of hazardous substances preventing their release into the environment.

WASTE HANDLING

This solution is best suited for waste which has been contaminated with heavy metals.

SOLUTION BENEFITS

- Immobilization of hazardous chemicals, preventing environmental contamination
- Compliance with regulatory requirements for safe waste treatment
- Contribution to sustainable waste management practices

We prioritize environmental protection and sustainability, providing access to compliant and innovative waste management facilities that uphold the highest standards of waste containment.

COST-EFFECTIVE. EFFICIENT. SUSTAINABLE.

Interwaste is a trusted leader in waste management, dedicated to ethical practices and environmental stewardship. With a focus on innovation and sustainability, we provide integrated solutions tailored to meet the diverse needs of industries, ensuring responsible waste management and environmental protection.
